- 1.1.4. Create an Equalization Reform Task Force to investigate the issues surrounding the Federal Equalization Program with the objective of developing a new equalization formula that correctly accounts for both provincial revenues and spending and thus is fair for all Canadians and in doing so strengthens the confederation.
- 1.1.5. Advocate that the equalization formulas take into account public policy decisions made by provincial governments that discourage economic activity and significantly limit responsible resource development.

1.2. ELECTORAL REFORM

This would apply to the Provincial Government, hospitals, school boards, universities, colleges, and other public sector employees who receive significant funding from the provincial government.
